

Our Team

Dr. Marcia

Dr Marcia Bonazzi is a very experienced obstetrician and gynaecologist who has delivered more than 10,000 babies throughout her career. Her aim is to offer the best support to her patients throughout their entire pregnancy journey, from the birth of the child and beyond into the early stages of motherhood.

Tamsyn Wymer

Tamsyn Wymer is a passionate registered midwife and nurse working alongside Dr Marcia to provide care, education and support to all antenatal and postpartum patients.

New model of care

Nurture Program

Introducing an exciting new approach to Private Obstetric Care

In my practice women have raised the following concerns :

- 1- OUT OF POCKET EXPENSES
- 2- INCREASING COST OF PRIVATE INSURANCE
- 3- THE ABILITY TO HAVE ACCESS TO BOTH MIDWIFE AND OBSTETRICIAN CARE
- 4- AVAILABILITY OF POSTNATAL SUPPORT AND ADVICE INCLUDING BREASTFEEDING AND FIRST TIME MOTHERS ANXIETY.

In order to more fully address individual patient needs we have decided to introduce two levels of care and support with significant cost savings for the patient.

Two options of care available

NurtureCare One

Care with Dr Marcia Bonazzi

Ideal for first time mothers and high-risk pregnancies. Some low risk first time mothers may be eligible. After the first visit with Dr. Bonazzi she will assess the suitability for each care.

Care will be with Dr. Bonazzi for all visits and with our midwife Ms Tamsyn Wymer for scheduled education.

NurtureCare Two

Collaboration with Dr Bonazzi and midwife Tamsyn Wymer.

Ideal for patients with previous low risk pregnancies.

Dr Marcia will see patients for the first visit and at 20, 30, 36 and weekly onwards and our midwife will see the patients the other visits.

Dr Bonazzi will provide care at birth including postnatal care in hospital.

Our midwife will call the patients after they arrive home and provide ongoing support including breastfeeding concerns.
